No members of the band started on their instruments before the organization of the band in March, a year ago. Ten members started since September 1929, and ten since January 1930. Only ten members have had any private instruction in conjunction with their work at school.

Except for the violins in the orchestra, only five of the remaining members have had work other than that given in school.

The band was organized in March 1929. The orchestra was organized in September 1929. Orchestra is a regular class and high school credit is given for both orchestra and band.
